

EF-11 Mini Laser Projector, 1,000 Lumens, Up To 150 Inch Display

Ideal for instant entertainment, the EF-11 is stylish, compact and lightweight with a screen size of up to 150 inches. Experience bigger, more immersive viewing at home or on the go for up to 10 years*. The EF-11 has Epson's 3LCD technology so images are clear, sharp and crisp. With built-in Miracast you can display content from a phone, streaming device, laptop, games console and more. The EF-11 is the perfect solution for a virtually connect home.

Compact and lightweight, the EF-11 is easy to move from room-to-room. This compact laser TV projector, part of the new EpiqVision Mini range, projects instantly and almost on any surface. Display content from a phone, streaming device, laptop, games console, and more with built-in Miracast. Keystone correction makes it quick and easy to set up, and with laser light source technology you can enjoy entertainment for years to come.

Stylish, mini laser projector

The EF-11 measures just 18cm along its longest edge, only weighing at 1.2kg. It can be projected onto almost any surface with or without a screen. It's elegant rounded corners and minimal buttons will make you want to leave it out on display for everyone to see.

Bigger is better

Create the big screen experience wherever you want with an impressive 150-inch display. With Epson's equally high White and Colour Light Output images are clear, sharp and content is brought to life.

Simple set up

We don't think a home projector should be any more complicated to use than a TV. That's why this projector is quick and hassle-free with features such as keystone correction to help position the image. Accessing your entertainment is easy too with Miracast built in, and a HDMI port for connecting streaming devices, DVD players, games consoles and more.

Long-lasting solution

The long-lasting laser light source will provide lower energy consumption, and you'll be able to enjoy home entertainment for up to 10 years*.

DATASHEET / BROCHURE
